SUMMARY

Front-end developer focused on building clean, accessible interfaces with HTML, CSS, JavaScript, and Tailwind CSS. Experienced in turning designs into maintainable, well-structured code across personal projects and an e-commerce storefront, with close attention to usability and visual consistency. Proficient with Git and GitHub, and comfortable using AI-assisted tools to speed up development. Looking to bring this skill set to a product-driven engineering team and keep growing as a front-end developer.

PROJECTS

Personal Portfolio & Resume Website 2026

github.com/rezakeyvanpour/Personalsite-Keyvanpour

Designed and built a personal portfolio and resume site from the ground up to showcase skills, projects, and professional background in a clear, well-organized format. Used semantic HTML and custom CSS to structure the content, with JavaScript for light interactivity, keeping the codebase clean and easy to maintain.

Personal Resume Website 2025

github.com/rezakeyvanpour/personalsite-ahmadi

Developed a personal resume website from scratch for a back-end developer, turning his requirements into a polished, easy-to-navigate interface that adapts smoothly across screen sizes. Handled the layout and styling with custom CSS and added JavaScript-based interactive elements to strengthen the overall presentation.

Phone-Center — Mobile Store Website 2026

github.com/rezakeyvanpour/Phone-Center

Engineered the front end of an online mobile phone store, structuring product and category pages with HTML and Tailwind CSS to create a consistent, scalable design system. Added JavaScript-driven interactivity so the shopping experience stays smooth and intuitive on both desktop and mobile.

Tasktop — Website Redesign (Discontinued) 2025 · Limited

Collaboration

github.com/mahmadii0/Tasktop

Took part in a brief, limited collaboration on Tasktop, helping refine the front end of the login and main pages using HTML, CSS, and JavaScript. The project has since been discontinued and is no longer active.
